Foreign Countries Aroused at Some of the Rates Fixed.

GERMANY'S INTERESTS HIT

Her Woollen and Suga Interests Affected Very Strongly.

MEXICO MEANS TO RETALIATE

If the New Tariff Retains the Prohibitive Rate on Cattle, That Country Will Immediately Revise Her Own Schedule.

Washington, April 3.—The Senate Finance filled with fracture cases. Among them is Committee has before it now one of the Ching-Ching, who is a very quiet, patient, most important matters to be decided in yellow, almond-eyed little chap. His Engthe new Dingley tariff measure. It is the lish is limited and very unlike his amia-protests that are being made by several bility, which has endeared him to his cot foreign countries against some of the rates | mates. Refined by his suffering and won

foreign countries against some of the rates and some of the reciprocity features of the bill.

The committee thoroughly realize that the farmer is the one to suffer most by protection and by the retaliation which protection brings, and that the farmer cannot be fooled much longer. They appreciate that the great bulk of exports to foreign countries is made up of farm products, and they know the farmer will feel the difference when retaliatory measures are agreed upon. Such threats have been made in very diplomatic language, and the committee has the task before it now of trying to clear away the difficulties.

Germany's Protest.

Notice has already been served by Germany that she will not stand such rates without protest. That country has before this shown what she can do with American maters. Refined by his suffering and won by his gentleness, the other inmates of the ward have ceased to call him "a Chink" or jest over the style of his hair. They tell this story of him, however, and the tall has as many conclusions as there are perject to the style of his hair. They tell this story of him, however, and the tall has as many conclusions as there are perject that story of him, however, and the tall has as many conclusions as there are perject that set over the style of his hair. They tell this story of him, however, and the tall has as many conclusions as there are perject that the great bulk of exports to tell it.

A rat was seen scurrying across the floor one night, and a nurse invited in a cat, which pursued the rat to a hole, watched for its reappearance and pursued his ratiship ineffectively many times. A small dog, was taken in to supplement the cat, but neither could capture the rat.

Ching became very much interested, and when the ward was most exclied, jumped from his bed and, with surprising swiff-ness, ran after the bounding rat. Just as the last leap for his hole, the Chinaman's floor one night, and a nurse invited in a cat, which pursued the rat to a hole, was taken in to supplement the floor one nigh

this shown what she can do with American meats. The Dingley bill hits her woollen and sugar industries much harder than the Leader of the West Point Band Resents a present law, and retaliation in some shape is promised upon breadstuffs and other case is acknowledged to be a hollow

m.

ance is ready to enter a vigorous test the minute the measure becomes a unless it is greatly changed from present form. Her trade in silks and les will be nearly shut off in this coun. She will stand ready to shut off serious products or impose such duties them as will equal the prohibitory tures of the proposed law. anada has served notice of retailation on lumber schedule. The rates have been ceed high, and the Canadians do not like. The committee knows this, and has own it for some time. Generally shows the great line of otestants. Senor Jose Yoes Limantour, creatry of the Treasury of Mexico, in a cent letter to a gentleman of this city, ates that if the new American tariff reins the prohibitive rate of cattle his santry will immediately revise her tariff, i food products, agricultural implements, irriture and machinery, all arleies which me principally from the Unity States.

Mexico's Interests at Stake.

The two items which are vitally impor-

The two items which are vitally impornt to Mexico are cattle and lead ores. to Mexico are cattle and lead ores.

the first the Dingley bill imposes a specic rate of \$6 per head, and as these are with on the average only \$9 per head for use over one year old, the rate equals an valorem of \$2.2-3 per cent. This of urse knocks them out completely, and the exican steer could not even get his nose or into the land of freedom and protection. This \$6 rate is as absolutely prohibite as the \$10 rate of the McKinley bill, der that not an animal came in and not lollar of revenue was obtained from Mexical cattle. As a result Mexico, which had fore let all our live animals in free of a duty whatever, except geldings, promption a tetaliatory duty of \$2 cents per our of the cents per pound.

Incertain live hog exports to Mexico had the contract of the cents per pound.

duty was imposed these fel off to less than \$3,000 per annum. Minister Romero Will Act. It is understood that Minister Romero,

formal protest against the \$6 rate.

formal protest against the \$6 rate.

The second item, as to which Mexico objects, is the duty on lead ores. The Dingley bill makes the rate one cent per pound on the lead contents, equivalent to 100 per cent ad valorem. Protests are pouring in from the West by those who see that a prohibitory rate on exitle and ores will have the effect of shutting the United States from a sorely needed outlet for surplus products.

The committee has been carefully considering all these dangers which threaten the success of the measure should it become a law, and they will have great weight in the final result. For the past week the committee has been busy with a general study of the measure. No special schedule has been selected. The bill in its general effects has been examined. The intention is to arriv at the general reduction that must be made and then the schedules will be fitted to the decreased amount.

of the American colony of London and elsewhere in the United Kingdom. Mr. Bayard was last heard from at Rome.

ORE PRICES TO BE UNIFORM. Pool Just Organized in Cleveland Will Prevent Overproduction.

Cleveland, O., April 3.-The meeting of the old range ore men was concluded this morning. The price of Norrie ore was fixed at \$2.65, and the prices of all other over a fixed on this basis. The organic ores are fixed on this basis. The organisation will serve to prevent an overproduction of ore, and will keep the prices uniform.

Note—High water at Hell Gate occurs 1 hour and 40 minutes later than at Governor's Island. The time used in this table is 75th meridian W.

A satisfactory decision has been reached as to the amount of ore each mine will produce. Carnegle and Rockefeller are out of the pool.

SATURDAY, APRIL 3, 1897.

STRIKES COMING IN CHICAGO. Electrical Mechanics Purpose to Force Contractors to Hire Union Men.

Chicago, April 3.-General strikes will be called on all buildings where electrical contractors attempt to finish the work they have in hand with non-union men. That was the result of the conference which Business Agent Quealey, of the Brotherhood of Electrical Mechanics, held with
other business agents of the building trades
council yesterday.

He stated he had called strikes on eight
buildings, and asked that committees be
appointed to all the brotherhood. This
was agreed to, and it was determined to
take general action early next week with
reference to those buildings where electrical contractors refuse to sign the new
scale and attempt to finish their jobs with
non-union help. Business Agent Quealey, of the Brother-

played. Woodford wrote a polite note, explaining the circumstances, and decline to come here for trial.

A day or so ago he received another communication informing him that the union had tried him, found him guilty and sentenced him to pay a fine of \$10. BICYCLE LESSONS FATAL. Martin Died from Heart Failure, While Try ing to Ride a Wheel. Watertown, N. Y., April 3.—Gardner C. Martin, aged about fifty-two, died in the street here this morning as the result of overexertion in learning to ride a bicycle. He had been practising and had fallen sev-

Game with Bare Hands.

THE DRUM MAJOR IS NETTLED

aundry, at West Point, from being frightfully mangled while at work yesterday morning. The girl was cleaning a machine rapidly revolving belt. Before making any outcry she tried to release herself from her rilous position, but only added to her perilons position, but only added to her danger.

Mrs. Hickey, who was working near by, happened to turn around just as the help-less girl was being swept from her feet toward the big shaft above. Without saying a word she rushed toward the machine, and with all her strength fell against the big beit and pushed it off the wheel. Before she could do this, however, the girl had been raised several feet off the floor, and in another second would have been dashed against the shaft.

When she was untangled from the belt the girl fainted, and it was some time before she was restored to consciousness. Her clothing was torn, her hands lacerated and she was badly shaken up.
